

## Visiting Student Research Program

### Student Research at Zeppelin University

Zeppelin University pursues an interdisciplinary, individualised and international approach in its teaching; research is a key focus for students from the outset of their study program. Once per semester, Student Research Day offers students the ideal platform for presenting their own research – regardless of whether they are just setting out with their projects or are already able to present results.

### About the program

Zeppelin University is well known for its outstanding student research. We invite international students (undergraduate/bachelor or graduate/master) to do a research project at Zeppelin University. Therefore, we designed the Visiting Student Research Program comprising one semester. The program aims to contribute to a fruitful international exchange in the field of student research.

### The program includes

- | Travel grant to Germany
- | Conference grants
- | Academic (co-)supervision
- | German language course
- | Cultural activities
- | Advisory service for accommodation, visa, health insurance, etc.

### Application process

Please, submit the [application form](#) via e-mail ([kathrin.krautheimer@zu.de](mailto:kathrin.krautheimer@zu.de)).

Deadline fall semester (starting Sep): 01 June

Deadline spring semester (starting Jan): 01 November
